

Bookmark Title	Page Number
CS100 Lecture 2	1
Variable declaration	1
Arithmetic types	2
CS100 Lecture 3	7
Operators	7
CS100 Lecture 4	10
Operators	10
Control Flow	13
Functions	14
CS100 Lecture 5	17
Pointers	18
Arrays	20
CS100 Lecture 6	22
Pointers and Arrays	22
CS100 Lecture 7	25
Pointers and Arrays	25
Dynamic memory	27
Strings	29
CS100 Lecture 8	31
Command line arguments	31
Example: Read a string of unknown length	32
CS100 Lecture 9	33
struct	33
Recursion	36
CS100 Lecture 11	38
std::string	38
CS100 Lecture 12	39
References	39
std::vector	45
CS100 Lecture 13	48
Type System	49
Functions	53
Range-based for loops revisited	56
CS100 Lecture 14	58
Members of a class	58
Constructors	62
CS100 Lecture 15	66
Constructors and destructors	66
Copy control	71
CS100 Lecture 16	76
Type alias members	76
static members	77
friend	80
Definition and declaration	81
Destructors revisited	83
CS100 Lecture 17	85
Move Operations	87
std::move	90
NRVO, Move and Copy Elision	92
CS100 Lecture 18	94
Ideas	94
std::unique_ptr	96
std::shared_ptr	99

CS100 Lecture 19	102
Example: Rational	103
Example: Dynarray	108
Example: WindowPtr	108
User-defined type conversions	109
CS100 Lecture 20	112
Algorithms	114
CS100 Lecture 21	121
Inheritance	121
Dynamic binding	124
CS100 Lecture 22	129
Abstract base class	130
More on the "is-a" relationship	132
Inheritance of interface vs inheritance of implementa	135
